

LOADING CHUTE HANDLING ASSEMBLY

The **2W Loading Chute Handling Assembly** is designed with strength and longevity in mind. This loading chute is adjustable from 12" to 51", and features a corrugated metal floor to aid with cattle traction while loading. Laser cut height adjusters are incorporated to the front of the loading chute to aid with loading into trailers of different heights. The loading chute also includes a walk-along side ramp that allows handling access throughout the entire chute.

The loading chute is powder coated in **2W Dark Gray** and **2W Red**.
